

AISPEC

Gruppo additivi e ausiliari per industria tessile, cartaria, conciaria e per il trattamento delle acque

AISPEC Generic Exposure Scenario Working Group – Workflow

Output compliant to standard terminology found in Guidance on Information Requirements and Chemical Safety Assessments

	Workflow Step	Tessile 2009	Cuoio 2009
1.	Create a comprehensive list of all substances included in additives and auxiliaries for textiles applications (in industrial/professional and consumer settings)		
	a. "SU5" Steps identification	Ok	Ok
	b. Substances identification	In progress	Ok
	c. Substances' grouping and matching, according to PC's criteria	Starting soon	Ok
2.	Test groupings and generate 'Textile additive and auxiliaries applications' in GES format and for Tier 1 Exposure Assessment'		
	a. Workers (industrial / professional)	Ok	Ok
	b. Consumers and	Stand by	Stand by
	c. Environmental Compartments	Ok	Ok
3.	Add use descriptions for other relevant life cycle stages:		
	a. waste disposal (just relatively to "post consumer use")	In progress	In progress
4.	Add information on typical operational conditions and risk management measures	Ok	In progress
5.	Publish initial information on AISPEC public website, including guidance for Suppliers and Downstream Users on the intended use of this information	In progress	In progress
6.	Request feedback from the Suppliers and Downstream Users on potential gaps, errors and suggested amendments	Ok	In progress
7.	Create Generic Exposure Scenarios for grouped applications	In progress	In progress
8.	Use recommended tools (e.g. ECETOC TRA) to characterise the risk for a typical textile additives and auxiliaries to demonstrate the use of the information by manufacturers/importers and to ensure validity of the process	To be defined	To be defined
9.	For each grouped application propose adequate risk modifiers for Tier 2 Exposure Assessment, where Tier 1 default values are shown to be inappropriate	To be defined	To be defined
